CAREER OBJECTIVE

To have a reputed career in the IT industry and upscale my career as a Software Engineer in an established organization that identifies my knowledge. I am a highly motivated individual looking to enhance my skills and gain on-ground experience in the field of Software Development. and Automation Software Testing

EXPERIENCE

Associate Software Engineer - Accenture (December 2022 - Present)

- I worked on automating the API testing using the Cucumber BDD Framework. I executed more than 400 test cases using automation.
- I also worked on Negative Cases Validation API Integration into current Automation Testing system.

Android App Development Intern at Unolo (Smartsense Technologies) (July 2021 - September 2021)

- I worked on the implementation features like random re-authentication, onboarding screen re-design and handling app permissions.

Android App Development Team BVPIEEE (May 2020 - July 2021)

- I developed the Android Mobile Application for my college Society (BVPIEEE)

PROJECTS

Airtel Interaction Project - Accenture

Role: Automation Api Testing

Unolo - A field force management tracking system (Internship App)

NoteItAll: A simple note-taking Android app

SCART: A Self Checkout payment android app

BVPIEEE Official App: Android App for BVPIEEE (IEEE's Student Branch at BVCOE)

Quiz App - Android App to play quizzes ([Java Version](#)) ([Kotlin Version](#))

Urban Sound Classification Using Convolutional Neural Network Model
